EXECUTIVE DASHBOARD | SECUREMOBILE

Lead GRC analyst: Adediran Eunice Adebukola | Registration: C11-26-CGRCE-17595

$35.00m	$8.04m	$26.96m	$805,000	3,249.4%
BASELINE ALE	RESIDUAL ALE	AVOIDED ALE	YEAR-1 COST	YEAR-1 ROI

Risk	Baseline ALE	After control	Financial priority
API authentication bypass	$750,000	$75,000	Moderate
Database injection	$31,250,000	$7,812,500	Critical
Session hijacking	$3,000,000	$150,000	High

Recommendation: Prioritise WAF deployment by day 30 and enhanced MFA by day 90; implement compensating API authentication safeguards immediately and complete gateway deployment by day 180. All dates are planning assumptions.

Decision caution: The $35m baseline assumes the stated probabilities apply to one annual loss event and that each event incurs the supplied maximum loss. Confirm loss severity, exposure, control coverage and technical efficacy before authorising spend.
